

Chumpon Apisuk, Spring 2021

“Joining the same fight”:

Burma coup took place on 1 February 2021, and people are on the street fighting against and denounce the military ruler. In Thailand on the eastern border of Burma, the coup took place 7 years ago, and now the regime is reinstalling itself after the election. The junta stay on top of the elected parliament members.

My performance is a statement of the present situation of place we are living in. And I express my solidarity with people of Thailand and people of Burma, in their stand against the military rulers.

I try to perform what the people in Burma do, today, in their daily protest.
